About Atmos Energy West Texas

Atmos Energy, West Texas Division consists of numerous distribution networks in the Texas Panhandle and South Plains area serving approximately 305,814 customers in 34 counties. These systems are comprised of 7,834 miles of main and associated service lines, and are primarily used to distribute natural gas from city gate stations to individual residences and businesses.

Products Transported and Counties Involved

Product	Description	Health and Fire Hazards
Natural Gas	Leak: Gas Vapor: Lighter than air and will generally rise and dissipate. May gather in a confined space and travel to a source of ignition.	Health: Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite.
