About O'Brien Energy Company

O'Brien Energy Company's operates the Carroll Springs Gathering System located in Henderson County, TX, which includes 1.5-mile natural gas transmission pipeline which transports residue gas from the Holcomb Plant

What does O'Brien Energy Company do if a leak occurs?

To prepare for the event of a leak, O'Brien Energy Company regularly communicates, plans and trains with local emergency responders. Upon the notification of an incident or leak, O'Brien Energy Company will immediately dispatch trained personnel to assist emergency responders. O'Brien Energy Company and emergency responders are trained to protect life, property and facilities in the case of an emergency. O'Brien Energy Company will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

Maintaining safety and integrity of pipelines

O'Brien Energy Company invests significant time and capital maintaining the quality and integrity of their pipeline systems. O'Brien Energy Company also utilizes leak surveys and on-ground observers to identify potential dangers. Pipeline personnel continually monitor the pipeline system and assess changes in pressure and flow. They notify field personnel if there is a possibility of a leak. Automatic shut-off valves are sometimes utilized to isolate a leak.

Products Transported and Counties Involved

Product	Description	Health and Fire Hazards	Counties Involved
Natural Gas	Leak Type: Gas Vapor: Lighter than Air Very flammable and a white vapor cloud may be visible near the site of a leak.	Health: Extremely high concentrations may cause irritation or asphyxiation. Possible presence of H ₂ S, a toxic gas. Fire Hazards: Extremely flammable and easily ignited by heat, sparks or flames.	<ul style="list-style-type: none"> Anderson Henderson
