About WTG Jameson, L.P.

Headquartered in Midland, Texas WTG Gas Processing, L.P. (WTGGP) and Davis Gas Processing, Inc. (DGP) are privately-held companies that specialize in gas gathering and processing in Texas, New Mexico and Colorado.

Founded by owner Mr. J. L. Davis in 2000 and 1979, we have become a leader in the midstream industry's ever evolving landscape and are committed to providing our services to customers for many years to come.

Products Transported and Counties Involved

Product	Description	Health and Fire Hazards
Natural Gas	Leak: Gas Vapor: Lighter than air and will generally rise and dissipate. May gather in a confined space and travel to a source of ignition.	Health: Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite.
Highly Volatile Liquids (HVLs) - Propane, Butane Natural Gas Liquids Ethane, Gasolines, Diesel, etc.	Leak: Liquid/Gas Vapor: Heavier than air	Health: Respiratory tract irritant; may cause central nervous system effects, drowsiness, asphyxiation. Both an irritant and a chemical asphyxiant with effects on both oxygen utilization and the central nervous system. Fire Hazards: Extremely flammable liquid or vapor, vapors are heavier than air and may accumulate in low areas and travel considerable distance to ignition source.
Counties Served	Brown, Coke, Coleman, Eastland, Nolan, Runnels, Taylor
