

Product: Natural Gas

24-hour emergency contact information:

1 (866) 322-8667

At Atmos Energy, we are committed to the safe operation of our pipeline system and employing the use of effective pipeline safety communications with emergency responders and the general public. Our goal is to achieve two-way communication with key stakeholders and communities in areas where our company operates. Besides conducting our business responsibly, we believe that our responsibility includes demonstrating our commitment and concern for the safety of the public, our employees and the environment.

Atmos Energy, Mid-Tex Division consists of numerous distribution networks serving approximately 1.5 million customers in some 440 incorporated municipalities, unincorporated communities and environs areas in over 100 counties throughout Texas. These systems are comprised of approximately 31,000 miles of main and associated service lines, and are primarily used to distribute natural gas from city gate stations to individual residences and businesses.

Atmos Pipeline – Texas operates more than 5,900 miles of transmission pipeline in Texas. The Atmos Pipeline – Texas pipeline system connects three major market centers – Waha in West Texas, Carthage in East Texas and Katy, near Houston, with Texas intrastate pipelines, interstate pipelines and plant outlets at more than 100 points. Additionally, Atmos Pipeline – Texas has five active natural gas storage facilities. These facilities, including two large-capacity underground salt-dome storage caverns, have a total working gas capacity of 39 billion cubic feet.

At Atmos Energy, we are committed to delivering natural gas safely and reliably and we look forward to working cooperatively with you to achieve this goal. For further information on Atmos Energy, Mid-Tex Division, or Atmos Pipeline – Texas, please call the appropriate area contact listed on the following page.

Atmos Energy's Emergency Response Plan is available on request. Please contact your local Atmos Energy office for more information.
