About Williams

Williams, including its assets held through Williams Partners L.P., is an energy infrastructure company focused on connecting North America’s significant hydrocarbon resource plays to growing markets for natural gas, natural gas liquids (NGLs) and olefins. Williams’ operations span from the Deepwater Gulf of Mexico.

Williams owns and operates midstream gathering and processing assets, and interstate natural gas pipelines. In addition, Williams produces olefins for petrochemical feedstocks.

Williams’ headquarters are located in Tulsa, Okla. Other major offices are in Houston, Pittsburgh, and Salt Lake City.

Products Transported and Counties Involved

Product	Description	Health and Fire Hazards
Natural Gas	Leak: Gas Vapor: Lighter than air and will generally rise and dissipate. May gather in a confined space and travel to a source of ignition.	Health: Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite.
Counties Served	Anderson, Andrews, Angelina, Atascosa, Cherokee, Dallas, Denton, Dimmit, Ellis, Frio, Hemphill, Hill, Hood, Houston, Johnson, La Salle, Leon, Madison, Martin, McMullen, Nacogdoches, Panola, Parker, Reeves, Robertson, Shelby, Smith, Tarrant, Webb, Wheeler, Zavala
